METHOD FOR MAKING A CLOSED CONTAINER, SAID CLOSED
CONTAINER, AND ITS COMPONENTS

5

The present invention provides:

- a method of producing a closed container with a tight and mechanically strong seal by fastening two metal elements of the body (1) and cover (2) type;

10 - said closed container, the structure of which comprises the two metal elements identified above fastened to each other;

 - the constituent elements of said container, considered independently and jointly, prior to said fastening: a) said body (1); and b) said cover (2); the internal structure of one of said two elements (1 or 2)
15 comprising a docking guide (3; 30; 300); and c) said docking guide (3; 30; 300) *per se*, when used as an insert.
